2. BACKGROUND

According to the Act, a protected cell company is able to segregate its assets into different cells within that company with a view of protecting each cell from liabilities of any other cell. It is necessary that such companies require applicable licences in respect to the activity or activities to be conducted by the PCC in accordance with the laws of the jurisdiction where they conduct their business.

2.1 Administration and Regulation of the Act

The Act is administered by FSA, described in the Act as the Authority. The incorporation is made by the Registrar of Companies appointed under the Companies Act, 1972.

2.2 Scope of the Act

The Act may be used by those companies for the businesses stated in Schedule 1. Due to the evolving nature of the applicability of Protected Cell Companies, the PCC Act, 2003 provides for flexibility in that the Authority may approve other relevant activities.

2.3 Management of the company

There shall be at least two individual directors. There is no provision for companies to be appointed as directors. The secretary must be an International Corporate Service Provider (ICSP) in Seychelles who will be responsible for submitting and authenticating signatures on all documents which are submitted to the Authority. The ICSP is responsible to conduct all enquiries and due diligence checks under the KYC norms. Documents may be served on a PCC by service of such documents on the ICSP at the registered office of the PCC, and any such service on the ICSP shall be deemed to have been serviced on the PCC.

2.4 Meetings and resolutions

Cellular assets are defined as assets represented by the proceeds of cell share capital and reserves attributable to a cell as well as all other assets attributable to a cell.
